Marvel Ukpong

Python/Django Entry Level Developer

Summary

I am a Django Web Developer, who is very passionate about what he does. I also have great interest in Robotics and ML.

Work Experience

I don't have any professional work experience to share, but I attended some BootCamp Trainings and had gotten a certificate of completion on FullStack Engineering at Ingressive for Good (I4G). I have also experienced working with a small team to create an animation library website like animate.css in Ingressive for Good. We worked on it using HTML/CSS, JavaScript and Python/Django. I volunteered to work on creating the virtual environment and creating the project structure, eventually making the website come live. I did that along side a partner.

I have worked on projects ranging from building small games to building web applications

Education

Senior School Certificate

SHOMS Internation Schools

📅 2017-2021

📍 Surulere, Lagos

Certificate of Completion on FullStack Engineering

📅 2022 (May-August)
